SMART Learning

SMART Learning

SMART Learning is a Customizable Content Management System. It allows schools, educational institutes, training departments, learning centers to provide distant learners with fully animated materials and activities. It gives you power to manage the learner access, progress, quizzes, generate certificates, re-sit for exams, and alert supervisors. Educators and tutors can upload their courses and projects and assess learners remotely.

SMART Learning offers you :

- * Design, develop, and upload courses and materials content in a simple and easy way.
- * Monitor learner activity, courses taken, quizzes results and qualifications gained.
- * Multiple channels between educators and learners through chatting, forums and blogs.
- * Manage user access for the learner and the parent/supervisor/tutor.
- * Flexible and expandable classification and categorization of content and audience.
- * Back-end Admin pages for self-managed projects.

On-site or Online ?!

ITQAN helps you deploy the Smart Solution on-site on your servers, or host it online on ITQAN's cloud to get the benefits of your solution with reduced initial investment.

Move Smartly to the future
